* Please note that the instruction manual applies to the game on the day it was released.
The gameplay may change depending on updates applied at a future date.

** Photos and images used in the manual were taken during development of the game, and may differ from the final product.

How to Begin Playing

Press the **START button** or **○ button** on the Title Screen to go to the Main Menu.

Select the mode you wish to play using the directional buttons, and then press the **○ button** to confirm.

MODE

Beginner Battle A mode for beginners with a tutorial.

Normal Battle Fight with the AI over 10 stages.

Hell Battle Fight with an extremely difficult AI over 10 stages.

MODE

My Own Battle A practice mode where you can select the track and difficulty.

Battle Together Battle with a friend using the Ad-hoc mode.

OPTION Change settings related to the game.

○ button Dropping Beatons

△ button Rotating Beatons R

□ button Rotating Beatons L

START button Pause Menu

** Button Configurations while in battle can be changed in the settings.

Basic Rules

Drop Beatons, and line **three** of the same color in a row to make them disappear. If Beatons make it all the way to the Control Area, then it will be game over.

► Drop Beats to the Music

Try to drop the beats when the Bar above the Beat Sync Gauge becomes blue. If you drop the Beatons while they're outside of the blue area, the Beatons will collapse.

► Connect a Lot of Beatons and Eliminate Them

Go for higher scores by connecting Beatons to each other before they disappear (The Link Window). Also, when Beatons disappear, you can eliminate the Jammer Beatons in the process.

Multiplayer

Take advantage of the PlayStation®Vita's Ad-Hoc functionality, and battle your friends.

▶ How to Play

From the Main Menu, select "Battle Together". Next, one person will select "Recruit Opponents" and decide the rules for the game. The other will select "Look for Opponents" and search for the player in the lobby. Once both parties are ready, the match can begin.
